## Personal Profile

---

I am a self-taught software developer with a deep passion towards web development. I have been programming for three years. After building several dynamic projects, I realized that I am enjoying programming even more today. The experience of designing web components that could affect user-interactions has always been exhilarating for me. Currently, **I am looking for an 8 month technical-internship position starting in January 2020.**

## Technical Skills

---

### Front End

- React.js
- React Native
- JavaScript ES6 / ES5
- HTML5
- CSS / Flexbox & Grid
- SASS
- Bootstrap 4

### Back End / Tooling

- Python3
- Django
- Node.js
- Git
- NPM
- Webpack
- Babel

### Database / Others

- MongoDB
- SQLite
- Java
- C
- MATLAB
- jQuery

## Technical Projects

---

*\*\* The link and GitHub Repo for these projects are accessible under my Portfolio \*\**

### React Social Media

(languages / Frameworks used)

This is an example of the project description. Feel free to add more.

### The Burger Maker

(languages / Frameworks used)

This is an example of the project description. Feel free to add more.

### Fake Reddit

Python3 | Django | vanilla.JS | Bootstrap

Created a fully functional back-end project where user could sign up, join groups or even create a completely new group / sub-reddit ! Just like Reddit.

### Personal Company Blog

Python3 | Django | vanilla.JS | Bootstrap

Created a fully functioning back-end project where user could create a blog post and add multiple comments. The original author of the blog would then pick the comments that will be allowed to be published publicly.

## Education

---

**The University of British Columbia:** Bachelor of Applied Science – Mechanical Engineering  
Expected May 2021
